Read the given passage and answer the questions that follow.

In this digital era, soft copies have been outweighing all the hard copies beginning with birth certificates, land records, books, e-papers, e-certificates and even currencies. The art of writing has been losing out. Still, I could vividly remember my grandmother showing me the letter that her father had written to her way back in the 1960s. The letter was half-torn and it had all its contents written with a fountain pen. Every time she reads the letter, she fondly reminisces her memories with her father. At the end of the letter, I could notice a teardrop at the corner of her eye. Such is the power of a hand-crafted letter. Being a child of the 21st century, I had little or no exposure towards writing letters.

After reading many articles in the newspaper as well as on the internet, I suddenly had a spark to write to someone. I went to the post office and bought a dozen inland letters and postcards. I wrote letters to my father, mother, grandparents, brother, sister, uncle and aunt on various occasions such as their birthdays and other events. The response that I got from them was unprecedented. I could empathise with their feelings and the emotions that the letter had kindled through their voices. At that moment, the gratification that I got was surreal.
