

Socioecology (JEL 303) (3:0:0)

(Advanced course: TNC Vidya)

This course is a paper-presentation and discussion course that builds upon the basic course Behavioural Ecology (JEL 206).

The topics covered vary from year to year and the following are indicative:

1. Social organization and social structure of animals
2. Socioecological theory and dominance relationships
3. Habitat use, foraging strategies
4. Animal movement analysis
5. Reproductive strategies and mating systems
6. Parental investment

Suggested reading: papers will be suggested to the students during the course.
